

Mathsplosion 2017

July 6th @ 7th 9:45 a.m. - 2:30 p.m

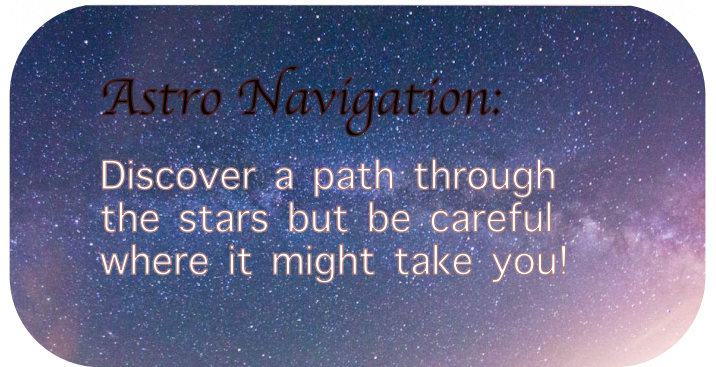

The FREE annual event for all able year 10 mathematicians is back at the Centre for Life – we even provide free lunch!

Möbius Bagels:

Discover how breakfast can drive you round the twist!

Come and enjoy a free day of timetabled workshops based around hands on maths activities at the Centre for Life. The workshops include the following and more: Möbius Bagels, Astro Navigation and The Magic of Card Tricks. This year due to popularity, the event is being repeated meaning that there are spaces for up to 20 schools. Please book early to avoid disappointment.

Astro Navigation:

Discover a path through the stars but be careful where it might take you!

Card Tricks:

Discover the maths behind the magic...

If you are interested in bringing a group of 10 Year 10 students and 2 members of staff to this event, please contact Jeremy Dawson: jeremydawson@furthermaths.org.uk

PLEASE NOTE: Although this is a free event, if you cancel your places less than two weeks before the event, we reserve the right to charge the school £100 as a cancellation fee. (We always have schools on a reserve list but they may not have the time to take up any unwanted places if schools cancel late and, although this event is free to schools, we have staffing, refreshment and venue hire costs to cover) .
