Professional Development

Using GeoGebra in teaching the new A level Mathematics (2017)

This is a ½-day course exploring using GeoGebra in teaching the new A level Mathematics (from 2017). The completely interactive hands-on sessions are designed to share techniques for integrating the use of technology including the requirements for the Large Data Set. The course is open to teachers at state funded schools.

Venue: University of Hertfordshire, College Lane, Hatfield AL10 9AB

Date: Tuesday 4th April 2017, 13.30-17.00.

Sessions:

- Teacher-centred and student centred uses of GeoGebra in A level Mathematics
- Using GeoGebra to investigate the large data set
- Integrating the use of technology into your scheme of work

Aims:

- To improve your skills in using GeoGebra
- To explore teacher-centred and student approaches for using GeoGebra
- To plan how to integrate these approaches into your teaching

Delegates are required to provide their own laptop with the latest version of GeoGebra installed.

No previous knowledge of GeoGebra is required. The course is suitable for all teachers of A level Mathematics.
