

KS5 London Network Day

A Brave New World

Date: Friday 7th July 2017

Venue: Holloway Road Campus, London Metropolitan University

Time: 10.00am to 4.30pm

Looking forward to a new A-Level working with students who have just sat the new GCSE.

An opportunity to share ideas, strategies and resources with other KS5 Mathematics teachers from across London

Over the last few years a really strong network of mathematics teachers had developed. Every year we meet to share some of our best ideas and resources and to do some mathematics together. During the day you will be actively engaged in trying out these ideas as well as thinking about some of the challenges ahead as we prepare for the new A-levels specifications. Teachers will be given a soft copy of the resources to take away with them at the end of the day.

Further Mathematics Support Programme

This year we are delighted to announce that the theme of the day is 'A Brave New World...' and with that in mind we have planned sessions on:

- Moving Maths – getting emotional while making maths 'move' Ben Sparks (FMSP)
- Workshops focussing on
 - Dealing with those elusive large data sets in the new A-Level specifications: Stella Dudzic (MEI Curriculum Programme Leader)
 - Maths in Transition. Making the leap from the new GCSE to the new A-Level: Carol Knights (MEI Extension and Enrichment Coordinator):
 - Making Further Mathematics work in the brave new world. How does Further Mathematics fit now it is decoupled from the A-Level?: Luciano Rila and Jenny Davey (FMSP)
- And of course a session where we can all share our best teaching ideas and activities

This event is always really popular so book now to avoid disappointment!

To apply, please visit this link for the [online application form](#)

The cost is £100 per teacher.

However, if your school is registered on the FMSP website then the cost is an amazing bargain price of £50 (Non-attendance will result in a charge of £100 per teacher)

You can easily register as a member of FMSP by visiting <http://www.furthermaths.org.uk/register> but please note: you will still have to complete the [online application form](#) for the course itself.

All enquiries to jamesmorris@furthermaths.org.uk
