

The Further Mathematics Support Programme

Preparing students for the MAT Examination.

Newcastle University.

Friday 14th July 2017: 9.30 to 3.45pm.

- Introduction for teachers and students into the problem solving skills needed for MAT
- Resources to support students preparing for MAT

The course is for teachers and students to work together to gain confidence in solving the types of questions seen on MAT examination papers.

Course aims:

- To look at developing problem solving techniques
- To provide opportunities to solve questions from a range of resources
- To solve questions from past MAT papers

Presenters: Michael Gibson and Paul Wilson (FMSP Associates)

Course fees:

The course is free for staff and students from state schools registered with the FMSP
