

## Greenwich Maths Time

### The IMA Festival of Mathematics and its Applications

27-28 June 2017, Department of Mathematical Sciences, University of Greenwich

The 2017 IMA Festival of Mathematics will comprise popular talks, workshops, hands-on displays and exhibitions, all showing the fun, excitement and amazing impact of mathematics on our world both now and in the future, and the diverse people doing present-day mathematics. All the Festival's events will be **free** to attend, with something for everyone: schools and families, teachers, practising mathematicians in industry and academia.

Presenters will include **Takita Bartlett, Nira Chamberlain, Rob Eastaway, James Grime, Jonathan Histed, Aoife Hunt, Jennifer Rogers, Ben Sparks, Katie Steckles, and Colin Wright.**

Visitors will learn about breaking codes, patterns and predications, angular momentum and boomerangs, mathematics and fashion, Black heroes of mathematics, women in mathematics, and many other topics.

There will be opportunities to find out about current mathematics research at a number of universities in life-saving applications such as medicine and fire safety engineering.

Organisations like the Mathematical Association, the British Society for the History of Mathematics, the Further Mathematics Support Programme, and *Chalkdust* magazine will be offering interactive activities during the Festival.

Attendance at the event is **free**: booking information for schools and individuals is available on the Festival website at [www.gre.ac.uk/mathsfestival](http://www.gre.ac.uk/mathsfestival).

The Festival is supported by the IMA, the University of Greenwich, the Further Mathematics Support Programme, the OR Society, the London South East and Kent and Medway Maths Hubs, and FDM.
