

## The Further Mathematics Support Programme

# Planning for delivering the new AS/A level Further Mathematics from 2017

This is a 1-day course to support teachers who are planning the delivery of AS/A level Further Mathematics specifications (from 2017) alongside the teaching of AS Mathematics content in year 12.

**Venue:** National STEM Learning Centre, University of York, YO10 5DD

**Date:** Wednesday 5<sup>th</sup> July 2017, 9.30-16.00.

### Programme:

- A detailed look at the different Further Maths specifications and options
- Exploring different strategies for offering Further Maths in parallel with Maths
- Resources for supporting students and monitoring progression
- Support with planning and implementing your scheme of work/curriculum map

### Aims:

- To understand the different AS/A level Further Maths specifications and options
- To consider different strategies for offering Further Maths in parallel with Maths
- To explore the resources and support available for delivering Further Maths

**The course is suitable for teachers who are responsible for the delivery of AS/A level Further Maths content to students in year 12, alongside teaching them AS/A level Maths content.**

**The course is not suitable for schools/colleges that are planning to teach all the A level Maths content in year 12 followed by all the Further Maths content in year 13.**

**Course/event fees and application:** The event is free of charge to state-funded secondary schools and colleges. To apply please complete the online form
