

Engineering mathematics network offers new resources and valuable ideas

“This was the best networking meeting I’ve attended for years.” (Network attendee)

Another chance has arisen for engineering mathematics practitioners to join a networking group where they can investigate a variety of approaches to teaching and learning and learn from each other. The opportunity is open to anyone teaching mathematics within engineering and will build on the very successful first meetings held at the end of last year. All are welcome: both those who attended last time and those coming for the first time. At the heart of the meeting will be a hands-on session developing new resources and everyone will leave with valuable ideas to use with their learners. The second set of network meetings are in March (all from 10.15am till 3.45pm – registration from 9.45am) at the following venues:

- 8 March – Bridgwater College, Bath Rd, Bridgwater, Somerset TA6 4PZ
- 17 March – The London Mathematical Society, De Morgan House, 57-58 Russell Square, London WC1B 4HS
- 22 March – University of Manchester, Renold Building, Altrincham Street, Manchester M1 3B

There is no charge for attending. To reserve a place or for more information, please email melanie.harradine@ncetm.org.uk

Here are some comments from attendees of the first networks in response to the question, which aspects of the event were most useful?

“Seeing up-to-date engineering.”

“Meeting other practitioners.”

“Ideas for new and existing resources.”

“Open discussion. Sharing good practice.”
