

The Further Mathematics Support Programme

Celebrating Women in Maths

A whole day dedicated to celebrating women in mathematics with fun engaging workshops and a very special guest speaker

**Hampshire Collegiate School, Embley Park,
Romsey, Hampshire. SO51 6ZE
Wednesday, 24th January 2018
9:30 – 15:30**

“One of the things that I really strongly believe in is that we need to have more girls interested in math, science, and engineering. We’ve got half the population that is way underrepresented in those fields and that means that we’ve got a whole bunch of talent ... that is not being encouraged...”

President Barack Obama February 2013

This day is aimed at girls (but boys are welcome too) in year 10 who are potential A level students but who may not be considering Mathematics because of lack of interest or confidence.

Embley Park was one Florence Nightingale’s homes in the UK; she is highly regarded for her nursing during the Crimean War; known as the “Lady with the Lamp”. She was an excellent statistician who used statistics to both inform her practice and communicate complex information.

Event Aims and description

We are pleased to announce that we will be running a special day for Year 10 students and their teachers to celebrate women taking maths further.

The event will take place on **Wednesday 24th January 2018 from 9.30am until 3.30pm** and is open to both female and male students.

There will be a series of engaging maths workshops throughout the day lead by eminent female presenters.

- **Outbreak!**
- **It's a disaster!**
- **Bubbles!**

The day will be initiated with a presentation by a special guest speaker – could there be a **ghost** from the past?

This event is free to all schools registered with the FMSP.

To book

To apply for spaces please complete the booking form <https://tinyurl.com/mathswomenjan18> , indicating how many places you are applying for (up to 15 places in the first instance).
