

Advanced Mathematics
Support Programme

Raising Confidence with Reasoning

This day focuses on the development of mathematical reasoning from KS2 through to GCSE. It will provide strategies and ideas for teachers to use in their classrooms to develop the skills of their students.

The suite of courses includes:

- Pre-course and Post-course tasks which are provided to support the teachers attending and enhance their experience
- Access to teaching resources
- Funding to enable teachers to attend
- Opportunities to spread professional development across your department as different teachers can attend

Course aims:

- To share ideas and strategies for developing **Reasoning**
- To provide support in developing your professional practice
- To experience an effective model for disseminating sustainable good practice across the department

Course fees and application:

This free course is offered to those teaching Mathematics in state-funded schools, colleges and academies. Participants' schools can claim £100 per teacher for each day to enable attendance (schools in Opportunity and Low Participation Areas can claim £150). A maximum of two teachers per school may attend; both will be eligible for funding.

Applications should be [online](#).
