Professional Development with the Further Mathematics Support Programme

Ideas for Simple Practical Work and Problem Solving in Mechanics

Woodroffe School, Lyme Regis
DT7 3LX

Monday 26th February 2018
10:00am – 3:30pm

This course aims to provide simple practical and problem solving ideas that can be used with students studying mechanics at A level, as well as a range of concept questions for promoting discussion and testing student understanding. All the ideas used will be ones that teachers can take away and replicate with a minimum of equipment and resources. All the delegates will be encouraged to carry out a range of activities.

Session 1: Introducing Mechanics

Session 2: Friction, Forces & Statics, Applying Newton's Second Law and Connected Particles.

Lunch

Session 3: Moments

Session 4: Projectiles

The cost per delegate will be £120, or £60 for delegates from schools registered with the FMSP. This includes break refreshments and lunch.

To book your place please use the google form here:
