

Focus of the Month April 2017

Revision

Our focus for this month is the support that the Further Mathematics Support Programme (FMSP) provides for students revising for examinations. We will also highlight other resources which are useful for revision.

Revision videos

The FMSP revision videos are topic-based and feature an explanation of the specifications and some example examination questions. All the examination questions are taken from 2010 and 2011 (January and June series). Videos are available for most of the Further Pure and Applied units for all the major specifications:

- [AQA revision videos](#)
- [Edexcel revision videos](#)
- [MEI revision videos](#)
- [OCR revision videos](#)

In addition to the topic-based videos there are additional individual questions from 2010 and 2011 papers provided as playlists.

In the [FMSP Revision Archive](#) there are recordings of two-hour online revision sessions from the summer of 2013. These also contain recordings for the Core 1-4 units as well as the Further Pure and Applied units.

In the [GCSE Revision Archive](#) there are recordings of revision sessions for the major GCSE Mathematics topics.

[Revision events](#) are also hosted in some areas.

Revision advice

[Revision advice](#) is provided to students to help them be fully prepared for examinations

Other useful sources of help with revision

[Integral](#) is a comprehensive set of online resources for all the major specifications. They are an excellent resource for revision (as well as being useful for teaching and learning throughout the course).

[Exam solutions](#) provides revision videos for many units on all the major specifications.
