Case Study: Continuous Professional Development

Teacher – Helen Hayes – Mathematics

CPD attended:

Teaching FP1 with Confidence – Bangor University 2015/16

Why did you take part and what were you hoping to gain from the course

I took part in the CPD in order to consolidate my understanding of the topics covered in FP1 and to discover ways of teaching each topic. I hoped that this would result in my being able to teach each topic with increased confidence and clarity.

What was your general overview of the course

Excellent course, it covered the whole syllabus of FP1 and I feel much more confident now with explanations and reasoning behind methods.

Impact on your school Further Mathematics Provision

Further Maths has been introduced this year at AS and will progress to A level next year – with an increased timetabled commitment. This is the first time I have taught AS Further Maths and following the CPD course I will be teaching A2 Further Maths during 2016/2017.
