Address	Tudor St, Ystradgynlais, Swansea SA9 1AP
Number of students aged 16 – 18 2014	65

Case Study:

Student – Anna Clancy

Further Maths Course:

I chose to take Further Maths because I find Maths very interesting and I was advised on a University open day that you needed Further Maths to get an offer from Cambridge. I did the course through the FMSP because Further Maths is not available at all in my school, and this was the only way I could take the course.

Further Maths has made me realise how much I enjoy Maths and I now know that doing a Maths degree next year was the right choice to make. Without Further Maths it is very unlikely that I would have received an offer from Cambridge University.

The online lessons were very interesting and the online classroom was easy to use and access. It was very different to my normal A-level Maths lessons as you have to do a lot of the work independently. Which I feel has been good preparation for life at University.

Benefits of Studying Further Mathematics?

I really enjoyed the course because the topics were more challenging and interesting than in normal Maths A Level. I would definitely recommend Further Maths to anyone who is interested in Maths and thinking about doing a Maths degree anywhere.
